

CSC 1980 – Innovation Time Project Progress Report

Cameron Lai-Harris, Ludwig Mueller, Silvian Ene

As part of your innovation time project, you are being asked to provide a status report at the midpoint of your project. In the report you should include the following items:

Project Description

Include the original project description from your proposal to remind us what your project is.

Work Completed

- Prototype images drawn for basic objects/characters
- Set up a Git Repository and learned a bit about how to use it to collaborate
- Got started using Xcode
- Learned how to create a sprite and move it with touch (that's all our code does for now)

Work Remaining

- Almost everything
-

Issues

In this section discuss any issues you have run into at this point in the project.

- Trouble getting the main object to follow your finger on the screen
- Installing VMs to run the game on computer

Directions

In this section include any directions needed to run your project demo at this point.

Code

In addition to the progress report itself, you will also be submitting a copy of your code. Make sure your code is building/running properly.

Submission

To submit this, ZIP up both your report and your code and submit in the portal. Please use the default zip/compression option on your OS. RAR files will not be accepted. Let me know if you have any questions.
